

The "Saudi GU Working Group" initiative aims to address critical challenges in the treatment landscape of genitourinary cancers, such as inefficiencies in referral pathways for urothelial and prostate cancers.

This initiative seeks to foster multidisciplinary collaboration between urologists, oncologists, and uro-oncologists to improve patient outcomes and establish evidence-based solutions through professional engagement and actionable insights.

1st Meeting

Prostate Cancer Focus

Tuesday
17th June

07:00 PM
10:00 PM

Objective:
Discuss referral barriers, evidence-based solutions, and a multidisciplinary approach to prostate cancer management.

 TIME	 SESSION	 DETAILS
7:00 PM - 7:45 PM	Session 1: Optimizing Referral Pathways in Prostate Cancer	Addressing inefficiencies, streamlining patient transitions, and enhancing inter-specialty communication
7:45 PM - 08:30 PM	Session 2: Multidisciplinary Treatment Approaches	Integrating urology, oncology, and uro-oncology for improved patient outcomes
08:30 PM - 09:15 PM	Session 3: Advancements in Prostate Cancer Therapeutics	Reviewing latest treatments, clinical trial insights, and emerging therapies
09:15 PM - 10:00 PM	Session 4: Roadmap for Implementation and Future Directions	Defining best practices, policy recommendations, and next steps for collaboration
